1. Have any precautions been taken to prevent internet providers from censoring websites and throttling certain connections? What will prevent them from doing this?

2. If Net Neutrality does end, how else would it affect a daily user (such as student) besides having to pay more for certain resources on the internet as well as having lower internet speeds?

3. How would repealing net neutrality affect new companies?

4. What view do cable and cell phone companies have on net neutrality?

5. How will repealing net neutrality benefit the public?

6. Why do people think net neutrality is a bad thing?

7. What is the most important con in your opinion for net neutrality?

8. If we do not have Net Neutrality, wouldn't there be a monopoly of one major carrier that would limit the internet access, and make people pay huge costs to access certain sites? Which if one carrier has a monopoly, wouldn't they just set prices to as high as they would please because people need access to websites?

9. Without Net Neutrality, will internet users see more or less advertisements than we see now?

10. Will granting the government power to regulate common carriers have consequences?

11. Will removing net neutrality affect innovation and smaller websites/companies?

12. If net neutrality does get repealed, what can we do then?

13. If net neutrality were to go away, would any consumers benefit in any way? Will the average user experience the internet differently from how they currently do? Net neutrality first officially came into being in February 2015- how did the internet change following its coming into effect?

14. There is a precedent of equal access on the internet since its creation/introduction to the general public, why bother changing something that isn't broke?

15. How do we ensure that the companies who provide the internet will consistently supply us with adequate internet for all services without net neutrality?

16. Will the government have too much power over what we can and can't access on the internet? Who specifically is for Net Neutrality and who is against it?

17. Is there anyway to have a middle ground between both sides (an alternative policy that limits government control over the Internet and the information but also keeps an open market protected from large corporations)?

18. How do you feel Net Neutrality impacts (positively and negatively) the next generation? How is Net Neutrality going to affect me at my age?
19. How do we ensure that the internet providers will provide us with consistent internet for all services without net neutrality?

20. How long has this fight been for Net Neutrality?

21. Why is net neutrality so important if we didn't have it before Obama? The internet seemed the same before and after net neutrality.

22. Will states be able to govern their own net neutrality laws or will it be a federal issue?

23. To what extent does net neutrality protect innovation?

24. If Net Neutrality is repealed could ISPs block access to competitor's sites?

25. If net neutrality was revoked how do you think it would affect a startup or small company?
